To keep from losing the split cable seal, attach a small piece of thin, double backed tape to the bottom. The seal will stay together and in place when you open the airbox.

GMP Breeze Configuration for Cable Blowing

Metal Drive Wheel Kit

Under certain conditions, e.g. in series blowing where lubricant is used, knurled metal drive wheels offer increased grip on the cable.

The kit contains a pair of knurled stainless steel drive wheels and a spring loaded mechanism which allows the drive to compensate for variances in cable diameter while applying a consistent force.

Metal Drive Wheel Kit
P/N 89692 Weight: 2.5 lbs. (1.1 kgs)

Accessory Air Hose

Complete with blow gun and Chicago fitting for direct connection to compressor.

P/N 89423
Weight: 2.3 lbs. (1 kg)

Blown Fiber Beads

Beads are crimped on the end of the blown fiber to help the guidance of the blown fiber through the microduct. Also reduces the risk of snagging at the connector locations. Sold in packs of 25.
