70454
Double 45° Corner Block w/High Strength Plastic Rollers

70455
Double 90° Corner Block w/High Strength Plastic Rollers

CORNER BLOCKS 45° & 90°

- Used to guide up to 1-3/8" diameter cable on inside or outside corners.
- Offers a bending radius of 23" (584 mm).
- Mounts on Pole Bracket GMP # 70372.

INSTALLATION PROCEDURE

1. Install Pole Bracket GMP #70372 by ratcheting until a tight fit to the pole. Attach the **safety clip** to the messenger strand after unit is attached to the pole.
2. Slide the Corner Block center **tube** over the **axle** of the Pole Bracket. Insert the **safety pin**, attached to the top of the block by lanyard into the axle's hole closest to the block. The pin prevents Corner Block from falling off the mount and allows the block to swivel with the cable.
3. Loosen both **knobs** at top of the block to loosen the **cable retaining rollers**.
4. Set up the **cable retaining** rollers approximately 1/4" above the cable to retain cable on Corner Block's rollers.
5. Reverse the installation procedure to remove the Corner Block.

Typical installation

WARNING: This equipment must only be used by authorized personnel who have been suitably trained and competent to do so. These instructions are to be made available to operators of this equipment at all times. Failure to observe these safety instructions could result in serious personal injury and or property damage.

Optional Vertical Angle Adapter GMP # 70440 (for use with single rollers only)

Accessory Pole Bracket
GMP # 70372
