

ACCELAIR 2 BLOWN FIBER MACHINE

The AccelAir 2 Blown Fiber Machine is the latest complement to the range of fiber optic blowing equipment available from GMP. Designed to suit the smaller end of fiber range from 2-12 fibers (.8-3mm dia.), AccelAir 2 completes the range of Tornado, JetSteam, AirStream, Breeze and Whisper fiber blowing installation systems all from GMP. A compact

integrated fiber-blowing machine, the AccelAir 2 benefits from full automation and fiber management. Its sophisticated fiber protection is designed to help ensure that the blown fiber mechanical and optical integrity is maintained. The machine is self-contained and only requires an electrical supply and compressed air to operate.

Main Features

- Installs cable diameters of .8-1.3mm with buckle protection. Up to 3mm without buckle protection.
- Accommodates microduct sizes of 3-10mm. Contact GMP for custom sizes.
- Can be powered directly by the supplied 120/240v universal power supply or the AccelAir 2 compressor's built in power 24v power supply. Optional 24v battery pack available.
- Light weight, durable construction with precision machined parts
- Single person operation
- Digital cable speed and length monitoring.
- Integral air valve and pressure gauge
- Low maintenance
- Durable carrying case included

Specifications:

Cable Diameter:	.8-3mm
Tube Size (Outside Dia):	3-10mm
Cable Speed (Adjustable):	0-328 ft/min (0-100 m/min) without buckle detection 0-164 ft/min (0-50 m/min) with buckle detection
Max Air Pressure:	220 psi (15 Bar) 8.5 cfm (.24 m³min)
Power Requirement:	120/220v to power supply, 24v from compressor or optional 24v battery pack
Width:	7.2" (184mm)
Length:	4.7" (120mm)
Height:	6.5" (166mm)
Net Weight:	6.6 lbs. (3kg)

P/N 89500

AccelAir 2 Blown Fiber Machine
Weight: 6.6 lbs. (3kg)

Durable carrying case included

Battery Pack and Vehicle Adapter Kit

Lithium Polymer battery pack for use in areas without commercial power.

Order: P/N 89438 Weight: 3 lbs (1.4 kgs)
